

[Enhancement request]: Stick to patchable version: requires  $\wedge$ = 0.1.0  
<https://github.com/nim-lang/nimble/issues/907>  
nimble install --retry:N for network commands that can fail  
<https://github.com/nim-lang/nimble/issues/906>  
Feature request: handle "No SSL/TLS CA certificates found"  
<https://github.com/nim-lang/nimble/issues/904>  
Remove usage of command string-based exec interfaces.  
<https://github.com/nim-lang/nimble/issues/895>  
Modern techniques for dependency resolution  
<https://github.com/nim-lang/nimble/issues/890>  
nimble installs dependencies multiple times, overriding commit pinning  
<https://github.com/nim-lang/nimble/issues/888>  
nimble loops infinitely trying to install codependent requirements  
<https://github.com/nim-lang/nimble/issues/887>  
nimble install error  
<https://github.com/nim-lang/nimble/issues/885>  
nimble publish failed if (local) git default branch name is not master  
<https://github.com/nim-lang/nimble/issues/881>  
Uninstall dependents doesn't work  
<https://github.com/nim-lang/nimble/issues/879>
